

Competing Products

Dealer Requirements limit displaying dealers from offering competing products (all aluminum) on residential projects. A representative list is provided below. Dealers may be allowed use of select products if the project is commercial in nature. However, authorization must be written by a Fleetwood executive before pricing is submitted. Elite level dealers are encouraged to avoid commercial projects as such conflicts with elite residential focus.

Dealers are required to notify Fleetwood if any competing products are on a project to which they are providing product.
