**CORNER POST**

**FRAME ANCHOR CHECKLIST**

- Fastener type
- Minimum embedment
- Minimum edge distance

**ANCHOR LOCATIONS**

- From ends
- On center
1. **Anchor Location**: Installer responsible to ensure anchors maintain edge distance on structure.

2. **Sill Disclaimer**: It is the manufacturer's desire for the installer to **not** pierce the sill. In some cases the code or specifications require such. In these cases the installer is responsible to seal these breaches.

**Notes**: *Anchor Location; Flashing Paper (on top of stucco surround).

**Fig. 1A**

**Acceptable Range**

**Installer Note**: Apply continuous bead of sealant between long leg and wall frame.

**Installer Note**: Set sill pan in full bed of sealant.

**Installer Note**: Flashing paper (behind sill pan and stucco surround).

**Installer Note**: Size and spacing of anchors per local code. (typical) (not by Fleetwood) (see Fig. 1A)

**Installer Note**: Seal fastener heads with compatible sealant as shown. (typical)

**Installer Note**: Solid shims required (typical) (not by Fleetwood)

**Installer Note**: No sealant between frame and sill pan.

**Installer Note**: Apply continuous bead of sealant along back and side legs. (between sill & sill pan only)

**Installer Note**: Solid shims at anchor locations required. (typical) (not by Fleetwood)

**Installer Note**: Solid shims required (typical) (not by Fleetwood)
